

Newlox Gold Ventures Corp.

Newlox Reports 370% Quarter-Over-Quarter Revenue Growth

Vancouver, 16 December 2019 – Newlox Gold Ventures Corp. (CSE: LUX Frankfurt: NGO) (“Newlox” or the “Company”) published financial statements for the second quarter of fiscal 2020. Management reports that sales revenue increased 370% quarter-over-quarter as a result of increased efficiencies at Newlox’s first artisanal tailings reclamation and precious metals recovery facility in Central America. Management expected this result as Newlox’s operations team has been executing its plan to ramp-up production at the facility.

From the start of commercial operations in June of 2019, Newlox has carefully increased throughput and improved efficiency. The operations team achieved production goals by re-investing operational revenue to facilitate incremental organic growth at Project One and intends to expand Newlox’s environmentally and socially positive business model to additional targeted projects.

Recent News

- Newlox recently shared a [video demonstrating the operation of its in-house analytical laboratory](#). The on-site laboratory has both fire-assay and atomic absorption capabilities, allowing for the sampling and assaying of both solid and liquid samples for precious metals. The lab enables strict control of feed grade, operational parameters, and metals produced.
- Newlox [marked four months of continuous gold production](#) on October 8, 2019 and shared a [second video of gold doré being poured](#) at the environmental remediation and precious metals production facility.
- Newlox posted [a video demonstrating one of the many regular gold doré pours](#) during the summer.
- Newlox [established steady-state operations](#) in June, as announced July 9, 2019
- The Company announced [completion of pre-production activities](#) on May 27, 2019.

About Newlox Gold Ventures Corp.

Newlox Gold Ventures Corp. is an environmental remediation company recovering contaminants and residual precious metals from historical waste left behind over more than a century of inefficient artisanal and small-scale mining in politically and socially stable jurisdictions in Latin America.

The Newlox environmentally and socially responsible business model has been deployed after extensive experience in the region and with the help of the Company's technical advisors at the Norman B. Keevil Institute of Mining Engineering at the University of British Columbia ("UBC") which, provides the Company with the unique advantage of not having to undertake exploration work or mining, resulting in dramatically reduced costs.

Newlox also benefits from the high grades characteristic of artisanal mine tailings due to the inefficient processing techniques used by the original miners.

With the guidance of its advisors at UBC, the Company has also identified essential remediation technologies designed to recover deleterious materials present due to historical artisanal mining practices and is deploying these systems in the field as part of the commissioning process.

Newlox has signed agreements with local artisanal mining cooperatives to provide both a steady supply of historical tailings and a newly created feedstock for its first fully operational processing plant in Central America.

With hundreds of years of mining history in Latin America and inefficient artisanal processing continuing to this day, the Company has identified and secured a compelling opportunity to grow its business model. Newlox has identified a niche within the extractive industry where a clean-technology company can apply innovative processing techniques to recover not only precious metals but also affect positive change in the environmental and social landscape in its targeted jurisdictions of operations.

Forward-Looking Information

The information in this news release includes certain information and statements about management's view of future events, expectations, plans and prospects that constitute forward-looking information. Forward-looking information includes, but is not limited to, the completion of the work programs currently underway and the results of these programs. These statements are based upon assumptions that are subject to significant risks and uncertainties. Because of these risks and uncertainties and as a result of a variety of factors, the actual results, achievements, or performance may vary materially from those anticipated and indicated by these forward-looking statements. The material risk factors that could cause actual results to differ include the risk that work undertaken by the Company may have unintended effects, the risk of delays in completing work, and the risk that the Company may not be able to raise sufficient funds and Force Majeure. Although the Company believes that the expectations reflected in the forward-looking information are reasonable, it can give no assurances that the expectations of any forward-looking information will prove to be correct. Except as required by law, the Company disclaims any intention and assumes no obligation to update or revise any forward-looking information to reflect actual results, whether as a result of new information, future events, changes in assumptions, changes in factors affecting such forward-looking statements or otherwise.

Neither Canadian Securities Exchange nor its Regulation Services Provider (as that term is defined in the policies of the Canadian Securities Exchange) accept responsibility for the adequacy or accuracy of this release).
